

ANGEL H. MORENU

Gainesville, FL | U.S. Citizen | Army Veteran

Email: angelhdbaez@gmail.com | LinkedIn: [linkedin.com/in/angelmorenu](https://www.linkedin.com/in/angelmorenu)

DATA SCIENTIST | DATA ENGINEER | BIOINFORMATICS/MACHINE LEARNING

As a Graduate Data Scientist and U.S. Army veteran with 8 years of honorable service, I hold an M.S. in Applied Data Science (Biomedical Engineering focus) and have hands-on experience with SQL, Python, machine learning, and data pipeline development. I have demonstrated ability to turn complex datasets into actionable insights through statistical modeling, visualization, and robust data engineering workflows. My background in logistics and military operations provides strong problem-solving skills, a focus on data integrity, and a systems-thinking mindset.

TECHNICAL SKILLS

Languages: Python, SQL, R

Data Analysis & Statistical Methods: Exploratory Data Analysis (EDA), Hypothesis Testing, Descriptive/Inferential Statistics, Regression Analysis, Classification Modeling, Principal Component Analysis (PCA)

Data & ML Tools: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Jupyter Notebooks, Excel

Visualization: Tableau, Power BI, KPI Dashboards, Trend Analysis, Operational Reporting

Data Engineering: ETL Pipelines, Data Cleaning, Data Wrangling, Data Validation, Relational Databases, SQL Query Optimization

Genomics / Population Genetics Tools: ADMIXTURE, qpAdm, hapROH, qpAdm, qpGraph, PCA, PLINK, EIGENSOFT, VCFtools, bcftools, BEDTools, Treemix, SHAPEIT, Beagle, samtools

Machine Learning: Logistic Regression, Random Forest, Model Selection, Hyperparameter Tuning (GridSearchCV), Cross-Validation, Performance Evaluation (ROC-AUC, F1-Score, RMSE, Confusion Matrix)

Workflow: Git, Reproducible Analysis, Documentation, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Regional Transit System — Gainesville, FL

Parts Specialist

November 2023 – December 2023

- Manage structured inventory datasets that support maintenance and operations decision-making.
- Maintain high data accuracy across inventory systems to reduce reconciliation discrepancies.
- Partner with technicians to ensure timely, accurate data logging and operational reporting.

US Army

September 2014 - March 2017

Equipment Records Parts Sergeant, Fort Bragg, NC

- Took ownership of the organization's equipment dispatching process to adhere to all safety and procedural guidelines; enhanced operational continuity practices.
- Proven to be a capable and dependable leader of personnel who deployed to Afghanistan, administered, and maintained mission-essential information systems.
- Completed all tasks and mission requirements with six personnel in the Shop Office; provided outstanding service support to the entire organization.

Warehouse Operator, Fort Bragg, NC

August 2013 - September 2014

- Processed over 380 repair parts worth \$34,000,000 in funds for the organization.
- Coordinated with adjacent units for parts and resources to ensure equipment readiness for future missions, resulting in no unnecessary downtime of equipment.
- Ensured shop stock and bench stock for three separate sections.

Combat Engineer, Joint-Base Elmendorf-Richardson, AK

July 2009 - May 2013

- Monitored 720 patrols, 1,143 air movements, 513 personnel, 83 Afghan Border Police missions, and daily key leader locations.
- Served as a Route Reconnaissance/Clearance Operator to accurately report, monitor, and analyze Improvised Explosive Device reports.
- Served to support three Battalion Field Training Exercises, two platoon live fire exercises, three squad live fire breaching exercises, and one rotation to the Joint Readiness Training Center (JRTC) in preparation for combat operations in Afghanistan in support of Operation Enduring Freedom 2011-2012.

ADDITIONAL EXPERIENCE

Customer Service & Sales Roles — Bass Pro Shops, Gander Mountain - Applied data tracking, inventory controls, and customer analytics in retail operations.

LEADERSHIP & MILITARY

- Army Veteran (8 years of service)
- Supervised and trained 10+ personnel

- Maintained accountability of \$140K+ equipment with zero loss

EDUCATION

University of Florida — Gainesville, FL

M.S., Applied Data Science (Biomedical Engineering Focus)

May 2026

Relevant Coursework: Machine Learning, Data Engineering, Bioinformatics, Statistical Modeling, Data Mining

University of Central Florida

August 2021

B.A., Religion & Cultural Studies; Minor, Judaic Studies

Seminole State College of Florida

August 2019

A.S., Supply Chain Management · A.A., General Education

PROJECTS

Capstone Project — Machine Learning for Genetic Variant Classification

Spring 2026

- Built an end-to-end Python and SQL pipeline to ingest, clean, and process biological datasets.
- Developed classification models to distinguish pathogenic vs. benign variants.
- Evaluated model quality with ROC curves, confusion matrix, and F1-score.
- Delivered reproducible workflow artifacts and technical documentation for repeatable analysis.

Machine Learning II Project — Cardiovascular Disease Risk Prediction

Fall 2025

- Compared logistic regression, random forest, and 1D CNN models on Kaggle cardiovascular datasets.
- Evaluated predictive trade-offs between accuracy, interpretability, and computational efficiency.
- Assessed model performance with metrics such as ROC-AUC, F1-score, and precision/recall.

Bioinformatics Project — Transformer Fine-Tuning for Regulatory DNA

Fall 2025

- Designed and implemented a pipeline to classify regulatory DNA elements (promoters, enhancers, DNase regions) and score non-coding variant effects.
- Fine-tuned transformer-based language models (DNABERT-2, Nucleotide Transformer) on ENCODE, Roadmap Epigenomics, and DeepSEA datasets.
- Benchmarked against CNN baselines (DeepSEA, Basset, Basenji) using AUROC, PR-AUC, runtime, and cross-cell-type generalization.

Machine Learning I Project — Spotify Data Science Project

Spring 2025

- Conducted exploratory data analysis and statistical profiling on music metadata and engagement signals.
- Built and compared Logistic Regression and Random Forest classifiers.
- Applied hyperparameter tuning with GridSearchCV to optimize model performance.

Global Religious Demographics Classification

Spring 2025

- Engineered features from multiple demographic datasets related to global religion projections.
- Applied PCA, UMAP, and t-SNE for dimensionality reduction and visualization.
- Trained logistic regression, random forest, and SVM classifiers to analyze and classify global religious demographics.

CERTIFICATIONS

- Fundamentals of Deep Learning (NVIDIA)
- OSHA 10-Hour Certification
- Forklift Operator Certification
- Certificate, Unit Movement Officer Course (40 hours)
- Certificate, Automated Logistics Specialist
- Certificate, GCSS-Army Overview
- Basic Combat Training
- Combat Engineer Airborne
- Route Reconnaissance/Clearance Operator (GWOT)
- Structured Self-Development I and II
- Warrior Leader Course
- Automated Logistical Specialist
- Unit Movement Officer Deployment Planning
- Introduction to Management
- Fundamentals of Intermodal Transportation
- GCSS-Army Overview
- Basic Leadership Course
- Combat Engineer Training
